

Campus layout

Kothrud, Pune • north at top

Vector redraw of the university's official campus layout sheet. Every footprint, gate, dome and name is traced from that sheet; nothing has been added or renamed, and no footprint has moved. Eleven names are nudged clear of a neighbouring block, a dome or another name, by the least that clears them, and three carry a leader back to what they name; AGASTYA's qualification is re-broken over two lines to fit the block it names. The set is checked box by box, so no name lies over a building it does not name. Five small blocks – west of Prayag, south of Encave Cafeteria- 2, south of Gautam, east of Agastya, and along the playground's west side – carry no name on the university's sheet and are left unnamed here. The trees, palms and the Vetral Tekdi ridge are illustration, not survey; they are placed to stand clear of every traced footprint and label, and the ridge is drawn outside the campus.
