THE HEARTBEAT OF MIT-WPU

INNOVATION

Monthly Newsletter |

APRIL 2024 | Volume 20

SHRI RAHUL V. KARAD
EXECUTIVE PRESIDENT, MIT-WPU

Dear Members of the MIT-WPU Family,

Today, I'm delighted to unveil the theme of our newsletter for this month, "The Power of Innovation."

In a world driven by progress, and change, innovation stands as a beam of hope and possibility. It's the driving force behind every breakthrough, every advancement, and every solution to the challenges we face.

At MIT World Peace University, we are proud to be at the forefront of promoting innovation among our students and faculty. Our university has always been a hotbed of creativity, where ideas are nurtured, and dreams are turned into reality. Whether it's through our cutting-edge research initiatives, our dynamic student projects, or our entrepreneurial endeavours, innovation is deeply ingrained in the fabric of our institution.

We celebrate the power of innovation through initiatives like R.I.D.E., a convergence of Research, Innovation, Design, and Entrepreneurship, and our dynamic Hackathons, where students harness their talents to craft ingenious solutions and projects. Our stories aren't just narratives of technological advancement; they're the beams illuminating the path to progress.

It gives me immense satisfaction to stand by the young creative minds who are continuously guided by their mentors, ultimately cultivating their innovative spirit. Together, let's harness the power of innovation to shape a brighter future for ourselves and for generations to come.

Warm regards,
Rahul V Karad
Executive President, MIT-WPU

DID YOU KNOW?

THE GENESIS OF A STUDENT DRESS CODE

In 1985, MIT-WPU played a pivotal role in fostering national pride among students. To commemorate Swami Vivekananda's birthday, the then **Vice Chancellor Dr. V.G. Bhide** and **Prof. V.M. Kulkarni (the author)** spearheaded a city-wide procession with students from 40 colleges.

Facing initial resistance from other institutions, they championed **the idea of a dress code for MIT students**. Believing it instilled professionalism and discipline, they encouraged students to wear uniforms during the march. This concept, initially met with apprehension, resonated with the students who desired leadership roles.

To ensure participation, the college facilitated credit purchases of uniform material and tailoring services. **On the procession day, 650 MIT students, smartly attired in blue shirts, dark trousers, and ties, stood out remarkably.**

This success led to the implementation of a mandatory dress code for staff and students on Mondays, later extended to Thursdays as well. MIT-WPU's pioneering initiative in student dress code continues to inspire institutions across the country.

DEPARTMENT OF ENVIRONMENTAL STUDIES CELEBRATES WORLD WATER DAY

In honour of **World Water Day** on March 22nd, Dr. Prasad Kulkarni, Dr. Soma Mishra, and students from MIT-WPU's Department of Environmental Studies actively participated in a celebration themed "**Water for Peace.**" The event witnessed a significant development with the launch of the **WASH Synergetic Alliance by the Ecosan Services Foundation**. This new initiative bridges the gap between academia and industry, fostering collaboration to achieve SDG 6: ensuring clean water and sanitation for all. Dr. Soma Mishra, a renowned expert in water treatment and characterisation, was also invited to deliver a talk at the event.

Dr. Soma Mishra
expert in water treatment and
characterisation

STUDENTS PARTICIPATE IN BIOENGINEERING EVENT AT GTU AHMEDABAD

The students from the **Department of Bioengineering** recently participated in a bioengineering event at **Gujarat Technological University (GTU) in Ahmedabad**. The event provided a valuable platform for students to explore advancements in bioengineering, network with peers from other institutions, and gain insights into the field's potential applications.

STUDENTS TACKLE THE STOCK MARKET AT "STOCKTALK"

MIT-WPU students gained valuable insights into the world of finance at the recent **"STOCKTALK: Learning the Basics"** event. Held on March 9th, 2024, the session aimed to equip participants with foundational knowledge of the stock market.

Guest speakers from SEBI and NSE shared expertise on investment strategies, risk management, and market analysis. This interactive session **empowered over 120 students** to make informed investment decisions and build financial literacy.

Positive feedback highlighted increased confidence in navigating the stock market. **Organised by SYBCOM Hons (International Accounting and Finance) students in collaboration with UTKARSH - The Business Club**, the event proved a success in fostering practical learning and preparing students for financial success.

FACULTY OUTBOUND - SOEC

The School of Economics and Commerce organised a one-day faculty retreat on 23rd March. With the core objective of building team cohesion and improving coordination, the retreat was held at the scenic site of Navali, Maharashtra. It was a day of learning and boosting spirits for everyone.

Based on the idea of "Teamwork makes the dream work", the faculty retreat focused on improving communication within the team to build unity and effectiveness. Numerous fun-filled activities were a good break from the work schedule for many while being a learning opportunity to make the workplace more positive and productive.

With lifted spirits and an amazing learning experience, the faculty retreat was a resounding success. The team achieved their goals of strengthening bonding and nurturing a positive nurturing environment. The School of Economics and Commerce also emphasises on the benefits and the need of more such retreats and programmes for better coordination and working of the faculties.

HAPPENINGS

BIOTECH INNOVATIONS AT HACKATHON

Dr Vishwanath Karad MIT World Peace University aims to harness the knowledge of Science and Technology for the welfare of the society and promote “**Culture of Peace**” through value based “**Universal Education System**” with a firm belief that Union of Science & Spirituality will bring peace to mankind. Hackathon is one such event where students from multiple departments come together to solve problems and develop innovative solutions with potential for entrepreneurship. This year Hackathon had a total of 9 tracks. **Dr Manasi Mishra from Department of Biosciences and Technology was the co-ordinator of the event.** Our students participated in Ideathon, Workathon and Biothon. Our esteemed jury members from Industry **Dr Milind Pore, Mr Piyush Joshi, and Dr Milind Choudhari evaluated the presentations and recommended the ideas for- Startup- 8, Funds- 12, Patent- 11, Design Registration – 7, and Copyright – 7.**

The Ideathon track of the HackMIT-WPU 2024 Innovation Hackathon was a platform for participants to come up with innovative ideas & solutions in the field of Biotechnology. The participants were given a specific problem statement and were encouraged to brainstorm, ideate and come up with unique solutions utilising the latest technologies and tools in the field of Biotechnology. The track provided an excellent opportunity for the participants to showcase their expertise in the domain of Biotechnology. Total 20 teams presented their ideas in the Ideathon. The ideas involved development of molecular detection assays, modern devices, eco-friendly solutions for water pollution etc. **Winning team GLUCOTRACKERS (UW46A1H3) Dr. Rehan Deshmukh, Bhavana Choudhary, Gauri Girish Gadgil, Yashaswi Baloria, kartik kalmegh, Unnati Vijay Ubhe, Shiksha Dubey presented their idea for Lateral flow assay for detection. First Runner-up team, Team Ash (UE3C296D) Dr Tejaswini Pachpor, Harsh Segrallu, Alfred Bennet Paul Nathaniel, Shivangi singh, Aryan Shinde, Aryaki Saykhedkar presented idea of constructing Cubit for nerve damage control. This team had 2 students from the engineering stream. Ideathon 2nd Runner prize was awarded to The Thinktank Thons (UC4O3V27) Dr. Shilpa Chapadgaonkar, Aniket Hiremath, Mahima Choudhury, Vrushali Gharat, Nishad Hemant Patil, Usha Choudhary. Two teams BioWave and Vita were awarded with appreciation prizes.**

Workathon track was for presentation of ideas with prototypes for which 2 teams participated. **Winning PKU (U30MQ73W)- Dr. Anup Kale, Dr. Shreeram Joglekar, Sanil Kulkarni, Anvita Gosavi, Madhu Choubey presented a detection assay for Phenylketonuria, a metabolic disorder.**

Biothon was the track for innovations in affordable healthcare. Total 10 teams participated. **Biothon Winner Team - Quant IEM (U17IY96T) Dr. Shreeram Joglekar, Riya Baporikar, Tanvee Vinayak Radkar, Rutushree Nagaraj Rao, Meghana Kiran, Tanishka Bhujbal. 1st Runner Team Circuit Healers (UU45N78R) & NeuroGuardian (U4HI34W1) 1- Neha Sathe, Aditi Jahagirdar, Arnav Khadkatkar, Surab Sebait, Vaidat Patel, Mahalakshmi Iyer ; 2- Dr. Shamla Mantri, Abhishek Tiwari, Sakshi Zagade, Vaishnavi Tule, Hemlata Ohal, Trupti Shelar, Kiran Satote Biothon 2nd Runner Team BioTechnos (UN002DL5) Dr. Anup Kale, Anvita Gosavi, Sanil Kulkarni, Mihir Kanitkar, Omkar Khare, Jancy Joy Biothon Appreciation 1- CrohnoCare (U42YQ80K) Dr. Shilpa Chapadgaonkar, Meetrayu Raut, Abhishek Aghamkar, Aarya Kunnure, Sharvari Bhosale, Animesh Inamdar.**

IN THE SPOTLIGHT

+ Arutchelvar Dr. N. Mahalingam Award Conferred upon Honourable Prof. Dr. Vishwanath D. Karad Sir

It brings us immense pleasure to announce that our esteemed Founder President, Rev. Prof. Dr. Vishwanath Karad Sir, has been bestowed with the prestigious Arutchelvar Dr. N. Mahalingam Award for the year 2024. This esteemed accolade was conferred upon him on Saturday, April 6th, 2024, by the esteemed Kumaraguru Institutions in Coimbatore, under the aegis of the Sakthi Group of Companies, a leading industrial conglomerate in Tamil Nadu with diversified interests ranging from sugar and dairy to financial services and automobiles, among others.

Instituted in 2014 in honour of the visionary industrialist and parliamentarian, Arutchelvar Dr. N. Mahalingam, the award recognizes individuals who exemplify this ethos and have made significant contributions to various spheres including national development, industry, society, culture, and more. Dr. Vishwanath Karad Sir's relentless efforts and visionary leadership have left an indelible mark on our community and nation at large, aligning closely with the ideals and aspirations of Arutchelvar Ayya. This award serves as a testament to his unwavering dedication and dynamic vision for a stronger and more prosperous India. We extend our heartfelt congratulations to Dr. Vishwanath Karad Sir for this well-deserved recognition of his outstanding achievements and contributions.

+ Hands-on Workshop on "STM32 & Raspberry Pi"

The department of Electrical & Electronics has organised a 4 days(30Hrs) Students development program on "Hands-on Workshop on "STM32 & Raspberry Pi" to Elevate Career Opportunities" from 10/04/24 to 13/04/24, time 9am to 5am. This workshop gives a kickstart to the students towards Embedded Software development through a practical and interactive approach. Workshop is developed with current market trends and demands. Spreading awareness of Automation & Embedded System.

+ Hackathon 2024

MIT World Peace University (MIT-WPU) hosted its annual Hackathon 2024 from , bringing together the brightest minds in technology and engineering. This year's event showcased a diverse range of innovative projects, giving the students a platform to practically apply their learning and participate in solving real life issues.

One of the **standout innovations** came from **Team Bolt**, the official electric vehicle designing and manufacturing club. Their **Teallectra Racing Superbike**, which achieved the **FMAE All India 3rd rank**, demonstrated their dedication to advancing sustainable transportation solutions. Notably, **the collaboration with Tesla resulted in sponsorship for their groundbreaking monocoque car**, reflecting the institution's ability to foster industry partnerships and drive innovation forward.

The event also **featured pioneering projects like CANset, MIT-WPU satellite club**, which is preparing to **compete in the ISRO in Space CANSat competition**. Leveraging hyper spectral imaging (HSI) technology, CANset's work in satellite imaging showcased its potential applications in agriculture, military, and environmental sectors.

Moreover, participants addressed pressing environmental challenges with projects like the Automatic Fire Extinguisher Robot and IoT-based vehicle emission monitoring system, showing the importance of fostering an environment to leverage technology for a sustainable future. It's inspiring to witness the incredible projects and ideas that emerge from this event, demonstrating the transformative power of technology in addressing real-world challenges.

The MIT-WPU Annual Hackathon 2024 not only showcased the technical prowess of its participants but also underscored the university's dedication to nurturing a culture of innovation, collaboration, and sustainability. As technology continues to evolve, events like these serve as crucibles for the next generation of innovators, shaping the future of technology and society.

+ Outbound Phase 2

In an extraordinary culmination of concerted efforts and unwavering dedication, the Outbound Phase 2 marks a significant milestone in our organisational journey. **Over the course of 4.5 months, a diverse array of activities were conducted for over 874 employees (phase 1 & phase 2 (non-teaching staff)). The second phase was targeted towards the non-teaching support staff, in an attempt to foster a culture of collaboration and innovation across departments.**

At the helm of this endeavour is our **Honorable Executive President Shri Rahul Karad ji**, who's strategic vision and guidance provided the foundational framework for success. Under the dynamic leadership of **Registrar, Ganesh Pokale and HR - L&D head Padmasree Barbora**, the project team navigated through various phases with commendable acumen.

A highlight of the initiative was the Leadership Talk Series, featuring luminaries from diverse fields who imparted invaluable insights and inspiration. Special recognition is owed to **Prof. Datta Dandge, Lt. Col. Arvind Gupta, and the other esteemed contributors for their enriching talks.** Furthermore, the tireless efforts of the event and support team led by Mr. Ankur Vaidya and Building Executives. We would also like to thank Dr. Nilesh Dhokane, Mr. Kunal Marathe, Mr. Parag Khanvilkar, Mr. Manas Kapoor and Mr. Harish Deshmukh for their support in the project.

The Outbound Phase 2 initiative has profoundly impacted our employees and staff, fostering an environment of collaboration and unity across departments. Through engaging in diverse activities and meticulous planning, team members have not only honed their skills but also forged meaningful connections with colleagues from different departments. **The initiative provided a platform for cross-departmental team bonding, allowing individuals to work closely together towards common goals, thereby breaking down silos and promoting a culture of collaboration.**

Additionally, the retreat-like atmosphere of the initiative offered a much-needed opportunity for relaxation and rejuvenation, enabling staff to recharge and return to their roles with renewed energy and enthusiasm. As a result, employees have emerged from this experience with strengthened bonds, enhanced teamwork capabilities, and a shared sense of purpose, poised to tackle future challenges with unity and resilience.

As we reflect on the journey traversed and the milestones achieved, we extend our heartfelt gratitude to each individual involved. Their dedication, contribution, and unwavering commitment have been the cornerstone of our success, propelling us towards a future brimming with endless possibilities and groundbreaking ideas.

+ Outbound Phase 2

MIT-WPU Prodigies

EMPLOYEES OF THE MONTH

Mr. Pramod Bhandare
ADMISSION

Mr. Pramod Bhandare’s exemplary dedication in implementing MIT-WPU scholarships, notably EWS concession and PERA CET initiatives, showcases outstanding organisational skills and meticulous coordination. His transparent communication and proactive approach ensure efficient scholarship disbursement, positively impacting students’s academic pursuits and enhancing organisational reputation.

Surendra Hanumantrao Kenjale
SECURITY & VIGILANCE

Surendra Hanumantrao Kenjale played a pivotal role in campus safety and security, overseeing crime prevention, emergency response, security measures implementation, community engagement, conflict resolution, collaboration with law enforcement, first aid assistance, and communication control. Additionally, he managed parking to optimise resources and promote sustainable transportation practices.

Ms. Hemlata Waghmare
SCHOOL OF LAW (PROGRAMME OFFICE)

Hemlata Waghmare is an exceptional performer in a wide range of roles, such as managing 17 ERP systems programmes, organising purchase-related activities, coordinating rural immersion for backlog students, spearheading data migration at PwC, and recovering fees for defaulting students while simultaneously coordinating with the respective faculties and coordinators. Her dedicated and can-do attitude, along with her skillful management of daily operations, sets her apart as an outstanding employee. She constantly goes above and beyond expectations with enthusiasm and determination, thus helping improve overall productivity.

Pralhad Wavalkar
R&D

Pralhad Wavalkar engages in project tasks, outsources printing services, procures necessary materials even during holidays, accommodates visiting faculty, guests, and performs other related duties as integral components of his responsibilities. Each action contributes to the smooth operation and success of departmental endeavours, ensuring that they meet objectives effectively and efficiently.

Achievements

+ M.Sc. Statistics Clinches Runner-Up at Ideathon with Smart Bus Scheduling Solution

The Transit Tracker Project by the Data Dazzlers team, led by Aditya Kadam and mentored by Dr. Amay Deshpande, is set to transform public transport in Pune. Recognised at the MIT-WPU hackathon, this initiative aims to address commuter challenges with the PMPML services by providing real-time bus schedules and arrival information through display boards at bus stops. Leveraging time data analysis for accurate updates, the project also explores revenue generation through advertising on these boards. With a strategic implementation plan spread over five years, focusing on development, expansion, and optimisation, the Transit Tracker is poised to enhance the commuting experience, making public transport more efficient and user-friendly.

+ Dr. Soma Mishra Joins WASH Synergetic Alliance

The Department of Environmental Studies, MIT-WPU is proud to announce **Dr. Soma Mishra's nomination as a Secretariat Member of the WASH Synergetic Alliance**. This appointment signifies the department's unwavering commitment to fostering collaboration and driving impactful change towards a sustainable future, ultimately achieving clean water access for all.

+ A Beacon of Innovation in Engineering and Education

Dr. Sheetal Abhijit Kulkarni is a senior professor with over 20 years of experience in academia and industry, specialising in Electronics and Electrical Engineering. With a Ph.D. in Audio and Video Steganography and an M.Tech in Biomedical Engineering, she has contributed significantly to both educational and industrial sectors. **Dr. Kulkarni has published 20 papers**, worked with notable companies, and is deeply involved in research areas like Cybersecurity in Biomedical Imaging and IoT applications. Her career is marked by a blend of teaching excellence and practical application.

+ Team Piranha Racing Shines at eBAJA 2024

The MIT-WPU Team Piranha Racing made a strong debut at the eBAJA 2024 competition, securing impressive podium finishes in both CAE (3rd place) and Engineering Design (3rd place).

The team, led by Prof. S.R. Deshmukh and Prof. Baidehish Sahoo, impressed the judges with their electric all-terrain vehicle (EV). They successfully cleared the gruelling mechanical and electrical inspections, showcasing their engineering prowess.

Team Piranha Racing also excelled in the CAE Finals, where they presented in-depth system analysis for each vehicle component. **Their efforts earned them the top honour (1st place) in this category.** While the team couldn't participate in the dynamic events due to a technical hurdle, their overall performance at eBAJA 2024 is a testament to their dedication and innovative spirit. This achievement marks a significant milestone for MIT-WPU foray into electric vehicle design and competition.

+ Dr. Kundlik V. Mali receives PRISM-1 Grant

Dr. Kundlik V. Mali (Professor and Programme Coordinator, Department of Mechanical Engineering) received a grant from DSIR, Government of India, through the PRISM-I Scheme for the research project "Energy efficient Air Conditioner using customised Ejector". PRISM-I The prototype of an ejector-based air conditioner has been successfully demonstrated to the expert panel of DSIR. Expert Panel comprises Dr. Naveen Jain- TOCIC Coordinator, Udaipur, Mr. Purushottam Kumar - Scientist-'D' (PRISM), DSIR, New Delhi, and Dr. Chitranjan Agrawal, - Expert member from TOCIC, Udaipur. The energy efficiency of an ejector-based system is about 14 % more than conventional type air conditioners.

The Indian patent is also published on the said project by Innovator, Dr. Kundlik Mali. The prototype was made available in the Refrigeration and Air conditioning Lab of the Department of Mechanical Engineering, MITWPU. During their visit to MITWPU, distinguished experts also delivered an enlightening session on "**Promoting Culture of Innovation in Academic Institutions through PRISM Scheme** " to the faculty members and students of MITWPU.

+ Dr. Umesh Dubey Publishes Book on Research Methodologies

Dr. Umesh Kumar Bhayyalal Dubey of the Department of Mathematics & Statistics for publishing his book, "**Research Methodology: Techniques and Trends.**" This comprehensive guide is designed for both undergraduate and postgraduate students, offering a clear understanding of research fundamentals and their practical application in business, industry, and research settings.

Packed with features like review questions, in-depth concept explanations, illustrative tables and figures, and practical guidance on conducting research projects, Dr. Dubey's book empowers students to excel in their academic endeavours. It equips them with a wide range of research methods, approaches, and data analysis techniques, making it a valuable resource for any aspiring researcher.

PAINTING with Words

By - Prashant Iyer

The Rise of Scorpion Startups: Seizing Market Dominance with Agility and Innovation

In today's dynamic business landscape, a new breed of startups is emerging, ready to disrupt industries and claim their place at the top. The term "Scorpion Startup" is not a commonly recognized or widely used term in the business or startup world. It does not have a standardised definition or specific meaning within the industry. Therefore, any reference to a "Scorpion Startup" would likely be based on individual interpretation or a specific context provided by the person using the term. It is important to note that the interpretation of the term may vary, and its meaning could be subjective or specific to a particular discussion or concept. These Scorpion Startups possess the agility, resilience, and innovation required to navigate complex market environments and carve out a niche for themselves. While "Unicorn" and "Cockroach" startups are more widely recognized terms in the startup ecosystem, the comparison between these terms and "Scorpion Startup" depends on the context in which they are used.

Here's a general comparison based on their typical connotations:

1. Unicorn Startups:

Unicorn startups refer to privately held startups valued at \$1 billion or more. These companies are often characterised by their rapid growth, disruptive business models, and ability to attract significant investments. They are considered rare and exceptional, much like mythical unicorns. Unicorn startups are associated with high valuations, large funding rounds, and immense potential for future success. They represent the pinnacle of startup achievement in terms of valuation.

2. Cockroach Startups:

Cockroach startups, on the other hand, are known for their resilience and ability to survive and adapt in challenging environments. The term "cockroach" refers to their ability to withstand adverse conditions and bounce back from setbacks. These startups prioritise sustainability, profitability, and long-term viability over rapid growth and valuation. Cockroach startups focus on building solid foundations, maintaining lean operations, and achieving profitability even in uncertain market conditions.

3. Scorpion Startups:

As mentioned earlier, the term "Scorpion Startup" does not have a widely recognized meaning. However, if we were to speculate on its potential characteristics based on the symbolism of a scorpion, it might imply certain traits such as agility, adaptability, and an ability to strike when the time is right. Scorpion startups could be seen as startups that possess the ability to navigate challenging environments with precision, responding quickly to opportunities and threats. They may be characterised by their ability to adjust their strategies, products, or business models to meet changing market dynamics.

It's important to note that the comparisons between these terms are subjective and based on general perceptions. The startup landscape is diverse, and different startups can have unique qualities that make them successful. The terms Unicorn, Cockroach, and Scorpion startups serve as metaphors to highlight certain aspects of startup behaviours, but they should not be seen as definitive categorizations or a measure of overall success or potential.

In this article, we delve into the rise of Scorpion Startups and explore how their unique characteristics position them to rule the market.

1. Agility in Adversity: Scorpion Startups thrive in adversity. They possess the ability to adapt quickly to changing market conditions and seize opportunities where others see challenges. Their nimble nature allows them to pivot their strategies, business models, and operations in response to evolving customer needs, technological advancements, or industry disruptions. This agility enables them to stay one step ahead of the competition.

2. Unleashing Innovation: Innovation lies at the core of Scorpion Startups. They embrace a culture of continuous experimentation, encouraging their teams to think outside the box and challenge the status quo. By fostering an environment that values creativity and risk-taking, Scorpion Startups can disrupt traditional markets with groundbreaking ideas, technologies, and business models. They leverage innovation as a strategic weapon to outpace established players.

3. Customer-Centric Mindset: Scorpion Startups prioritise understanding and meeting customer needs in the most effective and efficient ways. They leverage customer insights and feedback to shape their products, services, and experiences. By delivering exceptional value and personalised solutions, they establish deep connections and build loyal customer bases. This customer-centric approach gives them a competitive edge and positions them as leaders in their respective markets.

4. Lean and Scalable Operations: Scorpion Startups operate with a lean and scalable mindset. They focus on maximising efficiency, minimising waste, and optimising resources. By leveraging technology, automation, and data-driven processes, they streamline their operations and achieve rapid growth while maintaining cost-effectiveness. This lean approach allows them to scale quickly and efficiently, expanding their market reach and outperforming larger, slower competitors.

5. Collaborative and Agile Teams: Scorpion Startups foster a collaborative and agile team culture. They recognize that their success relies on the collective intelligence and diverse perspectives of their team members. By fostering a culture of collaboration, open communication, and continuous learning, they create high-performing teams capable of navigating challenges, seizing opportunities, and driving innovation. These teams are adaptable, resilient, and driven by a shared vision of market dominance.

As traditional market dynamics evolve, Scorpion Startups are poised to rise and claim their place at the top. With their agility, innovation, customer-centric mindset, lean operations, and collaborative teams, they are uniquely equipped to disrupt industries and shape the future. These Scorpion Startups are not just players in the market; they are poised to rule it. So, keep an eye on these dynamic innovators as they redefine the rules and set new benchmarks for success in the business world. In the ever-evolving landscape of startups, a new breed is emerging – the Scorpion Startups. These resilient entities possess a unique blend of attributes that sets them apart from the mythical unicorns and the adaptable cockroach startups. As we navigate through the challenging terrain of a funding winter, Scorpion Startups are poised not just to survive, but to thrive.

Unlike unicorns, which chase the elusive billion-dollar valuation, Scorpion Startups are built on a foundation of sustainability and profitability. They prioritise the creation of real value, solving tangible problems, and fostering long-term customer relationships. While unicorns may fall prey to their sky-high valuations, Scorpion Startups remain grounded, ready to weather the storms. On the other hand, cockroach startups, known for their adaptability, may struggle to sustain growth during a funding winter. Scorpion Startups, however, combine adaptability with unwavering focus. They pivot when necessary but never lose sight of their core mission.

In this funding winter, Scorpion Startups are the ones with the strategic armour. They diversify funding sources, optimise their operations, and build a fortress of resilience. These startups understand that in the long run, survival and success are not about meteoric rises, but about steady progress and unwavering determination. As we look to the future, it's evident that Scorpion Startups are the ones to watch. They are the true survivors, forging a path that goes beyond the hype and stands the test of time. They remind us that in the world of startups, it's not just about being flashy or nimble; it's about being enduring and impactful.

Your Living

Hello family,

You know, I see a vibrant hive of creativity at MIT-WPU. It fills me with immense pride to witness the relentless pursuit of innovation that thrives within these walls. Here, students and faculty aren't merely scholars, they're explorers, pushing the boundaries of knowledge and forging new paths.

I see bleary-eyed students huddled in labs, their faces illuminated by computer screens, their minds alight with ideas that have the potential to revolutionise the world. I hear passionate discussions in classrooms, where established concepts are challenged and new solutions are born. The tireless efforts of professors, and their guidance in shaping these young minds, fill me with admiration.

Team Piranha Racing roars onto the national stage, their electric vehicle a testament to their ingenuity. Dr. Umesh Dubey's book empowers future researchers. Events like STOCKTALK illuminate the path to financial literacy. These are just a few of the countless examples that showcase the unwavering spirit of innovation at MIT-WPU.

There are hurdles, of course. Moments of doubt and setbacks are inevitable. But here's what truly inspires me, your resilience. You dust yourselves off, learn from your mistakes, and with unwavering determination, forge ahead.

Curiosity is the seed of innovation. Never stop asking questions, and never shy away from exploring the unconventional. Let your imagination take flight. Together, we can shape a brighter future.

Faculty members are the architects of this innovative culture. Your dedication to nurturing young minds and fostering a spirit of exploration is invaluable. Keep inspiring, keep challenging, and together, let's make MIT-WPU a byword for groundbreaking ideas.

Together, we are a force to be reckoned with. Let innovation continue to be the cornerstone of the MIT-WPU legacy.
